PRECISION-CONTROLLED ROBOTIC GLASS  
INSTALLATION

# SL 280

INDOOR GLAZING ROBOT

**CAPACITY:** 280 KG

**IDEAL FOR:** Narrow indoor job sites and production facilities.

## SL 280 INDOOR

Probably the slimmest indoor glazing robot on the market today, it does not compromise on power and precision. The SL 280 Indoor is a powerful glazing robot designed specifically for indoor use, capable of handling elements weighing up to 280 kg (620 lb). With a lifting height of up to 270 cm (105 in.), it offers impressive reach. The rear-wheel drive enables exceptional maneuverability, making it highly agile in various settings. Additionally, the vacuum lifter can displace the load sideways by +/- 10 cm (4 in.), providing greater flexibility, especially in tight spaces within buildings or production facilities.

Model	Lifting Capacity Inside/Outside Arm	Lifting Height	Arm Extension	Inclination	Turning Radius	Suction Pads	L x W x H	Net Weight
SL 280	280/60 kg	275 cm	50 cm	49° back 104° front	116 cm	4xØ30 cm	217x63x133 cm	490 kg
